## Instruction For Authors

Agriculture and Food has been an interesting nutrient for human beings up to date. Food production has also become important with the increment of population. Everyone prefers good quality food having high nutritional value and long shelf life. The safe foods on which have been searched by the researchers will be investigated in the future, as well. Briefly, humanity will always be interested in what they are eating.

Potential topics include, but are not limited to:

- Agriculture-plant protection, weeds, plant disease, pests and control methods
- The novel chromatographic methods to determine both major and minor components of food(s) and medicinal plant(s) especially nutrients and/or bioactive compounds

• The chemotaxonomy of molecules in food(s) or medicinal plant(s)

· Analysis of the flavors and the essential oils of the food(s) or medicinal plant(s), chemistry relating to major and minor components of food(s)

· The chemical composition of the food(s) or medicinal plant(s)

· Fast screening and analysis of bioactive ingredients of food(s), including antioxidants, anticancer, anti-diabetes, immunomodulatory, anti-inflammatories, anti-microbial, polysaccharides and other phytochemicals

- The structural changes in the molecule(s) during or after food processing, food distribution and food local conditions
- Determination of food quality and safety and by-products, and the processing wastes
- Analysis of food contaminants, additives, and other agro-chemicals
- The inter-comparison studies of the results of methods to develop food reference materials of food components to be able to be used in the developed assays
- Determination of origin and authentication studies. Verification of organic, biological and ecological labeling of food(s) or medicinal plant(s) including origin labeling of honeys.
- The production of chemicals from natural origin in industrial scale studies will also be considered.

### Audiences:

Food engineers, Food technologists, Farmers, Agriculture, Chemist's, Toxicologists, and Researchers of the pharmaceutical and Food industries.

### Preparation of Manuscripts

Manuscripts should be prepared in English using a word processor.

Authors **must** use double spaced text and Citations in the text by using APA style reference style. All graphics and Tables can be integrated into the manuscript where the author wishes to place them. Requested supporting information must be prepared as shown in the [template of supporting information: Please click to open template file.](#)

The essential oil and fatty acids and related papers should be prepared according to requested rules of international standards such as RRI value report.

**Novelty statements** of submitted manuscripts must be provided as MS word file item by item. The maximum item should be 6 for the novelty statement.

**A graphical abstract** must be provided during submission. The dimensions of the graphical abstract must be 6.5 cm (h) x 12.5 cm (l). Please do not use the portrait version of graphical abstract. The graphical abstract must briefly show the contents of the abstract. Only structure of compound or picture of species not allowed for the graphical abstract.

**For new compounds:** New compounds search report of SciFinder should also be uploaded via the supporting information document system in PAMS.

**Review Articles** are critically evaluated on the specific area in natural product chemistry. If you would like to contribute to the journal with a review article, the authors must initially contact the editorial office by email to [info@acgpubs.org](mailto:info@acgpubs.org), as such articles are normally invited. **Authors submitting review articles should include a passport-sized photograph and a short biography in the manuscript.**

**Original Articles** are manuscripts describing original full length research papers in the field of agricultural and food chemistry area that have not published previously on the food and agricultural products and technologies, as well as new analytical methods (analytical methods must include method validation and uncertainty evaluation parts in the main text and the details must be given in the supporting information file), chemotaxonomic investigations, chemical ecology, and biotechnology. These manuscripts should reflect completed investigations rather than fragmentary parts of a larger study. In order to reduce manuscript length, specific experimental details, spectral data and repeated experimental parts should be prepared as supporting information.

The subtitles of Original Articles must be used as follows.

#### 1. Introduction

#### 2. Materials and Methods

**3. Results and Discussion (Results and Discussion sections can be numbered separately as Results, Discussion, as well as under a single heading, depending on the authors' preference.)**

#### 4. Conclusion

#### Acknowledgement (Optional)

#### Funding Statement (If applicable should be written)

#### Author Contributions (Mandatory)

#### Availability of Data and Materials (Mandatory for research articles it is optional for Review Articles)

#### Ethics Approval (If applicable should be written)

#### Conflicts of Interest (Mandatory)

#### Supporting Information (Optional)

#### References

Short Reports are suitable for reporting early reports on new food sources, biological sources, agricultural applications, essential oil compositions, and new activities of known compounds. Manuscripts describing bioactivity screening (e.g., antimicrobial, antioxidant, antifeedant, etc.) of crude extracts or predictable and/or unexceptional bioactivity (e.g., antioxidant activity of polyphenolics, antimicrobial activity of essential oils), are generally not acceptable. Short Reports should be kept to a maximum of six pages, including references.

The subtitles must be used as follows.

#### 1. Plant/Fungal/Microorganism Source

#### 2. Previous Studies

#### 3. present Study

#### Acknowledgement (Optional)

#### Funding Statement

#### Author Contributions

#### Availability of Data and Materials

#### Ethics Approval

#### Conflicts of Interest

#### Supporting Information (Optional)

#### References

**Special Issues and Book reviews** are collections of articles on the specific topics in areas related to aims and scope of journals published in the journal. Offers for the special topics must be applied to the editorial office.

**Video Paper;** Records of Agricultural and Food Chemistry is pleased to publish video recordings of articles published by its authors. Please prepare 2-4 minute videos in English, including the key points of your work, introduction, experimental, results, discussion, and conclusion sections, and upload them to the supplementary materials section. Please ensure that the visuals are clear, legible, and of high quality. Please also upload a transcript of the speech along with the video. The video and audio will be professionally edited by our team and presented to you in the final printing stage. Authors can choose to have their work presented in their own voices or in the voices of ACG Publications professionals. The special topics must be applied to the editorial office.

As the manuscript language is English, any author who is not fluent enough in English is encouraged to consult a fluent colleague or a paid editing service for the preparation of the manuscripts. Manuscripts having language deficiencies, i.e. grammar, fluency, etc., create heavy problems during the review process. Such manuscripts might be returned to the authors for correcting the language deficiencies.

**Manuscripts submitted to ACG publications are routinely screened by a software to check the originality of the submitted articles. It should be noted that ACG publications are committed to deterring plagiarism and self-plagiarism. Manuscripts submitted to ACG publications are routinely screened by a software to check the**

**originality of the submitted articles. It should be noted that ACG publications are committed to deterring plagiarism and self-plagiarism. A plagiarism report must be uploaded during submission of manuscript.**

Title of the manuscript should be as brief as possible and typed to the template file with affiliation and addresses of all the authors, including corresponding author with an asterisk. **ORCID**  of all authors should be added as shown in the template of manuscripts. The e-mail address, phone and fax numbers of the corresponding author should be provided as a footnote on the title page. Abstracts of all kinds of submissions should be prepared with a maximum 200 words.

Manuscripts should be compiled in the following order: Manuscripts should be compiled in the following order: **Title page; Abstract; Graphical abstract (in PAMS only), Keywords; Introduction, Materials and Methods, Results and Discussion, Acknowledgments; Appendixes** (as appropriate); **References**; using a decimal system for subsections. Novelty statements of manuscript must be provided and authors must adhere to [SI units](#). When using a word which is or is asserted to be a proprietary term or trade mark authors must use the symbol ® or TM or alternatively a footnote can be inserted using the wording below: Please see the details of section to the following link "[Guide for manuscript preparation](#)".

## References

The reference style has changed since the 2026 issues, and references should be written according to APA spelling rules. (Kytidou et al., 2020). Sample spellings are provided below. Unpublished results and personal communications should not be in the reference list, but may be mentioned in the text. If reference is made to papers submitted or in press, authors are requested to enclose a copy of manuscript or galley proof.

The following examples illustrate the format for reference:

### Journal citation

Kytidou, K., Artola, M., Overkleeft, H. S., & Aerts, J. M. F. G. (2020). Plant glycosides and glycosidases: A treasure trove for therapeutics. *Frontiers in Plant Science*, 11, 357.  
DOI:10.3389/fpls.2020.00357

### Chapter citation

Ulubelen, A. and Topcu, G. (1992). Diterpenoids from *Salvia* species and their pharmacological activities, In: *Studies in Natural Products*, ed: Atta-ur Rahman, Elsevier Science, Amsterdam, Netherlands, pp.363-381.

### Book citation

Adams, R.P (1995). Identification of essential oil components by gas chromatography/mass spectroscopy. Allured publishing Co. Carol Stream, Illinois.

## ATTENTION

The number of authors of the reference is more than 10, names should be written up to the 10th author, and et.al should be written thereafter. When there are 10 authors or less, all authors should be written as shown in the example. While the issue number is written in bold, the parentheses should not be written in bold.

**Warning: The most common mistakes for the References:** Writing format of author names, not writing the reference name in lowercase letters, placing a period instead of a comma after the reference title, Journal names should not be written in their abbreviated form and with a period after the abbreviation. If the journal name consists of a single word, please do not put a period at the end.

## Plagiarism Check and Ethics

Any manuscript submitted, soon to be submitted or in press at any other journal will not be considered by Records of Agricultural and Food Chemistry (RAFC)), and it is authors responsibility to inform the Editor of Records of Agricultural and Food Chemistry if such event exists. If the submitted manuscript is a revised version of a previously rejected by RNP, the authors must indicate previous submission in their cover letter and explain the reason/changes that they made in the revised one.

The *Ethical Guidelines for Publication in Journals and Reviews* issued by the [European Association of Chemical and Molecular Sciences](#) are applied by Records of Agricultural and Food Chemistry. Authors of all the manuscripts submitted to Records of Agricultural and Food Chemistry automatically accept the guidelines given in the [Ethical Guidelines for Publication in Journals and Reviews](#) and the authors have to provide the ethical board approved document informations ( the number and date and ethical board name of ethical approval) in the main text of manuscript and related data should be available in supporting information file of manuscript, if necessary or requested by the editorial office. The following studies strongly needs ethical board approval eg. any of in vivo studies on any animal and human body, studies of endangered species in nature, information about the people including any kind of survey data etc. For detail please see the COPE guidelines.

Authors are encouraged to attach an authenticated report during the submission to make sure that there is no plagiarism problem. Manuscripts submitted to Records of Agricultural and Food Chemistry publications are routinely screened by a software to check the originality of the submitted articles. It should be noted that RNP publications are committed to deterring plagiarism and self-plagiarism

ACG Publications journals use iThenticate® software to check the originality of submitted manuscripts for plagiarism. If a duplication is detected by the editorial office and reviewers, the manuscript will directly be rejected. If the authors use the same sentences of their or another authors previous work with citation without quotation mark, it will still be considered as self-plagiarism and plagiarism, respectively. Records of Agricultural and Food Chemistry has the right of removing any article published in RNP, and banning the authors submitting their studies in future if any ethical violation is identified.

### Copyright

It is a condition of publication that authors vest or license copyright in their articles, including abstracts, in ACG Publications. This enables us to ensure full copyright protection and to disseminate the article, and the Journal, to the widest possible readership in electronic formats as appropriate. Authors must accept the articles published in the journal for free all around the world. To read and download published papers is free for scientific purposes.

### Supplementary Material

Supplementary materials could be sent together with manuscript submission such as spectra, video, Picture etc.

### Publication Fee\*

ACG Publications is happy to announce continuation of the publication of Records of Agricultural and Food Chemistry completely free of charge for two years and as RAFC papers are now supported by Troyasil HPLC Column Technologies. On this occasion, we would like to thank [Troyasil HPLC Column Technologies \(www.troyasil.com\)](http://www.troyasil.com) for their great support to our scientific community.

The authors are charged a fee for English language corrections and/or journal format corrections requested by the authors or editorial team. These services are not considered within the free publication criteria of related journals of ACG PUBLICATIONS.

**\*While the fees given in the table above are valid for articles up to 8 pages, a fee of 10 USD is requested from authors for each page after 8 pages.**

### Withdrawal of a Manuscript

If the authors intend to withdraw their manuscript after it has been peer reviewed, or after it has been typeset, but not yet published, you will be asked to pay according to the following:

For peer review: 200 USD per article

For peer review and typesetting: 300 USD per article

### Proof Corrections

**The proof corrections must be done carefully by the authors. When proof corrections are returned to Journal further corrections are not allowed.**

**Erratum or Publisher Correction.** Notification of an important error made by the journal that affects the publication record or the scientific integrity of the paper, or the reputation of the authors or of the journal.

**Corrigendum or Author Correction.** Notification of an important error made by the author(s) that affects the publication record or the scientific integrity of the paper, or the reputation of the authors or the journal.

**Retraction.** Notification of invalid results that affect the reliability of a previously published article. The original article is marked as retracted but remains available to readers, and the retraction statement notifying readers of the invalidity of the published paper is bi-directionally linked to the original published paper.

**Addendum.** Notification of additional information about a paper. Addenda are published when the editors decide that the addendum is crucial to the reader's understanding of a significant part of the published contribution. Addenda include Editorial Expression of Concern, which is an editorial statement alerting our readership to serious concerns with the published paper. Editorial Expressions of Concern are typically updated with another amendment once further information is available. The editors may request additional information after publication of the article from the authors and it can be available on the page of the article.

### Peer Review Policy

All published research articles in Records of Agricultural and Food Chemistry have undergone rigorous single blind peer

Gülşah Mutlu

[Determination of Thymoquinone Substance In Trace Amounts In Black Cumin Oil And In A Flavor Using High Performance Liquid Chromatography](#) - **p.66-66**

Meeting Abstract (Poster Presentation)

Ganime Selen Karaçahalılar and Muhammed Fatih Albayrak

[Evaluation of Time Dependent Oxidation of Some Berry Flavors with CUPRAC Method](#) - **p.67-67**

Meeting Abstract (Poster Presentation)

Dilaycan Çam, Cansel Çakır, Mehmet Uğurlu, Ilgaz Akata, Şevki Arslan and Mehmet Ozturk

[Cytotoxic Activity of Lactarius salmonicolor R.Heim&Leclair Apolar Extract Against Most Common Cancers and Determination of Cytotoxic Compounds Using GC-MS and Chemometric Techniques](#) - **p.68-68**

Meeting Abstract (Poster Presentation)

Miglena Nikolova, Danail Pavlov, Miroslav Eftimov, Antoaneta Georgieva, Milena Salbashian, Mehmed Abtulov, Miroslav Novakovic, Vele Tešević and Stefka Valcheva-Kuzmanova

[The Bioflavonoid Fustin, Isolated from Cotinus coggygria Heartwood, Restores Intracellular Activity of Superoxide Dismutase in a Rat Model of Trinitrobenzensulfonic Acid-induced Colitis](#) - **p.69-69**

Meeting Abstract (Poster Presentation)

Bertuğ Arisut

[A Candy from Orange Peels Using Osmotic Dehydration](#) - **p.70-70**

Meeting Abstract (Poster Presentation)

Merve Özer, Berfin Eda Elcik, Güllü Aykara and Melek Ezgi Irmak

[Development of Sausage Formulation and Optimization of Process Parameters Compared to Cellulose Casing, Utilizing High Moisture Barrier Polyamide Casing as an Alternative](#) - **p.71-71**

Meeting Abstract (Poster Presentation)

Berfin Eda Elcik, Merve Özer and Ayşegül Yavaşcan

[The Impact of Coating Materials Obtained from Alternative Starch Sources on the Quality of Processed Chicken Meat Products](#) - **p.72-72**

Meeting Abstract (Poster Presentation)

Cenk Pasa and Turgut Kılıç

[Different Salt Concentrations and Ascorbic Acid Effect on Germination of Blue Skullcap \(Scutellaria lateriflora\) Plant](#) - **p.73-73**

Meeting Abstract (Poster Presentation)

Gizem Nazlı Ural and Osman Kadir Topuz

[Cell-Based Crustacean Meat: Commercial Species, Cell Isolation Methods, and Culture Conditions](#) - **p.74-74**

Meeting Abstract (Poster Presentation)

Gizem Nazlı Ural and Osman Kadir Topuz

[Cellular Seafood: Current Challenges to Overcome in The Development of Cellular Seafood](#) - **p.75-75**

Meeting Abstract (Poster Presentation)

Turgut Kılıç, Cenk Pasa and Ahmet C. Gören

[Medicinal Use and Chemical Composition of Scutellaria baicalensis Species](#) - **p.76-76**

Meeting Abstract (Poster Presentation)

Esra Bursa

[From Child Development to Country Development with Food](#) - **p.77-77**

Meeting Abstract (Poster Presentation)

Hilal Ata, Onur Bozkurt and Onur Karaalioğlu

[Developing an Emulsifier/Stabilizer Blend for UHT Pudding Production by Using Encapsulation Technique](#) - **p.78-78**

Meeting Abstract (Poster Presentation)

Cansel Çakır, Kübra Tuna, Dilaycan Çam, Fatma Aydoğmuş-Öztürk, Şevki Arslan and Mehmet Ozturk

[Acetone Extract of Tricholoma scalpturatum \(Fr.\) QuéI Induced Apoptosis in Colon \(Caco-2\) Cancer Cell Lines](#) - **p.79-70**

Meeting Abstract (Poster Presentation)

Hüseyin Kanbur

[Food Irradiation for Food Safety and Its Legislation in Turkey](#) - **p.80-80**

Meeting Abstract (Poster Presentation)

Hamza Çatal

[Determination of Sugar in Honey Samples Using NMR Spectroscopy and Chemometric Methods](#) - **p.81-81**

Meeting Abstract (Oral Presentation)

Mehmet İnan

[Production of Food Industrial Enzymes from Recombinant Microorganisms](#) - **p.82-82**
